About me

Back-end developer with extensive expertise in Laravel and PHP, dedicated to architecting scalable APIs, optimizing complex database schemas, and building robust data layers. Proven ability to collaborate closely with front-end teams to deliver seamlessly integrated, secure web applications, complemented by intermediate proficiency in NestJS and a foundational understanding of Vue.js.

Work Experience

Senior Backend Developer

Ultra Wares/ Full Time

July 2025 - Present

My Responsibilities:

- Develop and maintain RESTful APIs and backend services using Laravel.
- Design database schemas, relationships, and optimize queries for performance.
- Collaborate with frontend developers and QA to ensure seamless integration and high-quality code
- Utilized version control systems (e.g., Git) to manage code repositories, track changes, and collaborate with team members.
- Managed version control and CI/CD pipelines using Git, GitLab CI/CD, and other DevOps tools.

Senior Backend Developer

Madfox Solutions / Full Time

February 2024 - July 2025

My Responsibilities:

- Developed and maintained microservices architecture using Python and Flask to support scalable and high-performance financial applications.
- Designed and implemented RESTful APIs for seamless integration with core banking systems.
- Worked on FinTech Studio, a composable middleware that centralizes banking data, manages APIs, and enables rapid product development without disrupting core operations.
- Implemented authentication, authorization, and security best practices to safeguard sensitive financial data.
- Integrated with third-party banking services and APIs to enhance system capabilities.

Full Stack Developer

IXCoders / Full Time

November 2022 - February 2024

My Responsibilities:

- Engaged in end-to-end web application development, spanning both front-end and back-end components.
- Developed robust server-side applications using PHP and the Laravel framework.
- Implemented RESTful APIs, database migrations, and authentication mechanisms.
- Designed and optimized database schemas using SQL for efficient data storage and retrieval.
- Created interactive and dynamic user interfaces using JavaScript and jQuery.
- Utilized version control systems (e.g., Git) to manage code repositories, track changes, and collaborate with team members.

My Responsibilities:

- Participated in Agile Scrum events, including sprint planning, daily stand-ups, sprint reviews, and retrospectives.
- Developed robust and scalable server-side applications using PHP and the Laravel framework.
- Worked extensively with Magento 2, customizing and extending its core functionalities to meet specific ecommerce requirements.
- Implemented RESTful APIs and web services to facilitate communication between the front-end and backend systems.
- Designed and optimized database schemas using MySQL for efficient data storage and retrieval.

Projects

Harbuk

A syrian full-stack e-commerce platform which provided an intuitive and user-friendly shopping experience for customers. Implemented features including product catalog management, shopping cart management and e-payment processing.

Technologies: Magento 2, Laravel, PHP, MySQL, Payment Gateway APIs, Reports, Redis

Pyramind

A group-oriented TMS designed to manage projects across multiple companies and departments within the same group. unlike standard tools, it allows projects to be shared seamlessly between departments and companies, enabling cross-organizational collaboration and centralized task tracking.

Technologies: Laravel, PHP, SaaS, MySQL, System Reports

Monaco Taxi

A transportation platform that connects passengers with drivers similar to UBER. Designed and implemented various features including real-time location tracking, e-payment processing, and user management.

Technologies: Laravel (Backend API), Vue.js (SPA Components), Blade (Admin Dashboard), Node.js & Socket(Real-time Services), MySQL/PostgreSQL, Redis

Schooly

Developed a comprehensive data automation system for schools and institutes to streamline and manage key processes, including student information, teacher details, grades, and attendance.

Technologies: Laravel, PHP, MySQL, Payment Gateway APIs, Email & Notifications, System Reporting

RP

Led the development of an advanced application that provides efficient solutions for service providers and users seeking services. This comprehensive application goes beyond basic functionalities, incorporating features like service requests, chats, order tracking, invoice generation, and seamless electronic payments.

Technologies: Laravel, PHP, MySQL, Payment Gateway APIs

Khutwa

Led the development of an interactive educational platform designed to enhance the learning experience for teachers and students. The platform facilitates seamless communication, video content sharing, attachment uploads, and incorporates assessment features such as exams and challenges.

Technologies: Laravel, PHP, MySQL, Blade templates, Video Streaming, Email & Notifications

Twjeih

Developed a comprehensive E-Learning Platform designed to offer a wide array of courses and packages. The platform facilitates seamless course purchases, video content delivery, and incorporates a dynamic coupon system to enhance user engagement and affordability.

Technologies: Laravel, PHP, MySQL, Video Streaming, Email & Notifications, Blade templates

Theriac Pharma

Led the development of an expansive and sophisticated dashboard system tailored for a leading medical and pharmaceutical enterprise. This comprehensive solution optimizes the management of pharmaceutical representatives, emphasizing streamlined sample assignment and efficient data entry from doctor visits.

Technologies: Laravel, PHP, MySQL, Blade templates, Notifications, Blade templates, Notifications & Reporting

Education

**Bachelor of Electrical Engineering -
Computer Engineering (74.69%)**
**Damascus University - Faculty of Mechanical
& Electrical Engineering** **2014-
2020**

Languages

Arabic: Native
English: Proficient user (C1)

Skills

- **Backend & Architecture:** PHP, Laravel, NestJS, Vue.js, Microservices, OOP, Design Patterns
- **Databases & Search:** PostgreSQL, MySQL, Redis (Caching & Queues), Elasticsearch
- **APIs & Networking:** RESTful API Design, Real-Time WebSockets (Socket.io), Payment Gateway Integrations
- **Frontend & UI:** Vue.js, Modern JavaScript, Filament, HTML5/CSS3
- **DevOps & Tools:** Git (GitLab), CI/CD, Technical Documentation
- **Methodologies:** Agile/Scrum Leadership, Jira Sprint Planning, FinTech Security Standards
